

URBIOFUTURE WEBINAR 2

Educational and professional gaps and skills mismatch in the European Bioeconomy

1. Introduction (4 min.) SIE

- Welcome and introduction to the webinar.
- Icebreaker through a quick poll:
 - What's your background?
 - What do you expect from this webinar?

2. What is the Bioeconomy and its impact in our daily lives? (10 min.) VITO

Even though we already had a similar module to this one in our previous webinar, I think it's good to make such an introduction to set things in context. Last time we framed it talking about the job foresight. This time maybe we can talk about the impact the bioeconomy has in different fields, and provide some of the numbers and data that the EC highlights, such as:

https://ec.europa.eu/research/bioeconomy/pdf/ec_bioeconomy_actions_2018.pdf
https://ec.europa.eu/research/bioeconomy/pdf/ec_bioeconomy_infographic_2018.pdf

3. Brief introduction to the UrBIOFuture project (4 min.) TBD

Again, even if we repeat content, I think it's good to have a 3 minutes short introduction about the project. This would be a good slot for any partner who didn't participate in the previous webinar and would like to participate in this one. Otherwise, I suggest that the UAB or SIE do it.

4. Educational gaps identified in the different regional contexts and action fields (12 min.) UAB

5. The results and impact of the Biorruuki Case Study (10 min.) VTT

6. Closing remarks and call to action to see more in our website and attend our events. (5 min.) CTA / SIE

7. Q&A (15 min.)
