

Chem2Dmat

AUGUST 31 – SEPTEMBER 03, 2021 BOLOGNA, ITALY

MAIN TOPICS

- Synthesis, processing and multiscale characterization of 2D materials.
- Bottom-up growth.
- Covalent and non-covalent functionalization.
- Synthetic 2D materials.
- Design of 3D functional materials from layered systems.

ORGANISING COMMITTEE

- Vincenzo Palermo (Italian National Research Council (CNR), Italy)
- Paolo Samori (Université de Strasbourg / CNRS, France)
- Xinliang Feng (TU Dresden / cfaed, Germany)
- Antonio Correia (Phantoms Foundation, Spain)

PLENARY SPEAKERS

- Yury Gogotsi (Drexel University, USA)
- Klaus Müllen (Max Planck Institute, Germany)

KEYNOTE SPEAKERS

- Kian Ping Loh (National University Singapore, Singapore)
- Valeria Nicolosi (Trinity College Dublin, Ireland)
- Elisa Molinari (Modena University, Italy)
- Xinliang Feng (TU Dresden, Germany)

Special option "meet the nature editor"

Participants of CHEM2DMAT will have the opportunity of a one-to-one session with an editor of the Nature Portfolio journals, to present new ideas and discuss possible publications.

**Deadline for abstract submission:
June 4th, 2021.**
